Boston, Massachusetts 02108

Re: public corruption

Dear Special Agent Kaiser:

My co-complainant David Higgs and I wish to express our thanks for the professional service given us by Agent Russell on November 25, 2003. We left your office satisfied that our issue had been fully grasped. We understand our matter has been referred to your Public Corruption Unit.

We are encouraged by a statement on the Bureau's website, that "[t]he FBI's highly sensitive public corruption investigations focus on all levels of government (local, state, and federal) and include allegations of judicial ... corruption."

We are alleging shocking, self-evident fraud by a state Superior Court Judge – and/or by members of his staff – to cover-up wrongdoing in the high-profile, politically charged state Charter School Program. Several defendants in our civil action "Beck v. DOE" are also high-profile, to include a senior vice-president of the Boston Globe and current Commissioner of Education.

For your and the Unit's information, I am enclosing a series of communications with the Massachusetts Commission on Judicial Conduct, the last of which refers to our November 25 filing with Agent Russell.

We believe that our website [<http://BeckvsDoe.wellrock.net/>] will facilitate your staff's preliminary inquiry into our complaint.

Sincerely,

Rodney W. Young
